REQUEST FOR PROPOSAL (RFP) #2026-FIN-089

Omni-Channel Wealth Platform Modernization

Section 1.1 Project Objectives

The Client seeks proposals from qualified system integrators to engineer, deploy, and maintain an institutional-grade wealth management platform. The platform shall support multi-factor authentication (MFA) for all administrative and client access sessions.

Section 1.2 Target Delivery Schedule

The overall solution must be fully delivered, tested, and live in production within 8 weeks of contract signing. Time is strictly of the essence, and contractor shall achieve final production go-live without schedule deviation.

Section 2.0 Infrastructure Architecture

Section 2.1 Hosting & Deployment Boundary

Hosting Mandate: Due to regulatory data secrecy covenants, all application compute workloads and primary persistent data stores must be deployed strictly on client-owned on-premise hardware inside our Frankfurt private data center.

Section 2.2 Directory Integration

The solution must support single sign-on (SSO) integration with client's enterprise Azure Active Directory via SAML 2.0 and OpenID Connect protocols.

Section 3.0 Core Integrations & Data Migration

Section 3.1 Legacy Banking Interfaces

The platform must ingest, transform, and reconcile daily transaction feeds from three core banking ledger systems within a 2-hour batch window.

Section 3.4 Historical Data Migration

Contractor is solely responsible for extracting, cleansing, and migrating 25 Terabytes of historical transactional records from legacy Oracle databases prior to cutover.

Section 4.0 Persistence Architecture

Section 4.2 Managed Cloud Database Services

All relational databases must utilize AWS RDS PostgreSQL in Multi-AZ configuration with automated snapshotting and continuous replication.

Section 4.3 High Availability Guarantees

System must achieve 99.99% service availability during scheduled core business hours with automatic failover under 60 seconds.

Section 5.0 Performance & Contractual Terms

Section 5.1 General Performance Sizing

Platform should support high traffic with sub-second API response latency under peak trading volumes.

Section 5.3 Contractor Indemnification & Liability

Contractor accepts unlimited financial liability and agrees to fully indemnify the client against any direct or consequential damages, operational disruptions, or data loss.
